

Astronomy by Patrick | small moral stories in english

Mentally determined - will be actively committed.

But Patrick's intention is that assurances, other than his are not true.

He has been doing research on astronomy.

When he told others from time to time what he was finding in his research, everyone praised him.

He also received various gifts. He stared at the sky day and night for astronomy. So he had forgotten his surroundings.

He immersed himself in research on the sky at times other than bedtime. He does not walk on the ground but in the sky.

Anyone who comes along the way will leave Patrick looking strange. As he used to walk looking at the sky, he forgot anything like the ridges, pits, thorns, stones on the ground.

So sometimes he gets hit and injured in the arms and legs.

Still he didn't stop walking looking at the sky. **One night as**

usual, on the full moon he was looking at the familiar stars, and after a short distance he felt like flying in the sky.

In a few seconds of flying he felt like he was waking up with a sudden noise. It was revealed that he had fallen into a deep well, built of stones in all four directions and interspersed with trees and plants.

He shouted facing towards the sky, “please someone save me from the well.”

It fell on the ear of a guard near the paddy field, and when he ran he saw Patrick in a deep well. The guard, thinking that he cannot bring Patrick above the well alone, went to a town about a kilometer away, gathered people tied up several house ropes, lowered them into the well by a large barbed wire, and lifted him above the well.

An old man who came near Patrick knew the details and said, “Brother! You are welcome to look at the sky and do research. But at the same time we have to walk on the earth by ourselves. What is the use of such research by forgetting the earth?”

Moreover, in what way is it fair to pollute the earth by bombs, making atomic bombs, killing and burning?

What the old man asked made Patrick think.

Let's focus on the earth first. Realising that. Don't ever think to fly beyond being.
