

Clever Lamb Story

The three lambs Raju, Ramu and Rana were loving brothers. They lived in a beautiful small house. One day a cunning wolf came to live next to their house.

The lamb brothers were frightened when they saw it. The big lamb said, **“That wolf can eat us whenever he wants. We have to be careful, this house is not safe either.”**

Brother lambs agreed. So they decided to build a strong house. They finished building that house as soon as possible, the house was so beautiful and strong. One day the wolf came next to the house and knocked on the door so that he could catch and eat the three lambs.

But they didn't open the door and the wolf said, **“Hey, you lambs, open the door or else, I will come in by breaking the lock.”** Then, the wolf tried for a long time to break down that door, but he could not break that strong door.

The angry wolf then thought of a plan. He climbed up to the house and entered in through the chimney above. But the lambs had already set up with a very

clever plan. The lambs set the wood and fire on the chimney. They waited for the wolf to jump through the chimney

The wolf came through the chimney to eat the lambs but it fell into the fire, alas! Oops!. It started shouting. The wolf ran away with the burn wound and never came to the side of the lambs again.

Thus by the clever plan the lambs escaped from the wolf.
